Keltbrays Capability

An introduction to the group

As the UK's largest specialist demolition and civil engineering and waste services contractor we offer a full service capability Nationwide. Our reputation for delivering on even the most complex of projects for major Clients has been built on trust and the ability to protect our Client's reputation.

In the pursuance of our work, we take the utmost care to employ best practice in terms of project delivery and the protection of the site, surrounding location and the wider environment in which we operate.

This approach has seen growth that has turnover exceeding £120m, with approximately 50% of our work executed on a negotiated or partnering basis.

For the future, Keltbray will continue to develop its range of service offerings for clients through its key Business units :-

 - Keltbray Ltd is the Prime business unit of the company with full demolition, groundworks, civil engineering and construction capabilities.
